Print-spec exceptions

BPC-157 5 mg and 15 mg / Lyophilized vial / Shared supplier review checklist

PHYSICAL PACKAGING STATE / DESIGN

BPC-157 5 mg / GEN-GRP-0264 **BPC-157 15 mg / GEN-GRP-0263**

Obtain supplier inputs and approve a physical proof before artwork goes to press.

SUPPLIER INPUT	REQUIRED CONFIRMATION
Vial and closure	Confirm the selected vial and closure specification for each SKU. This determines label fit and the physical mockup.
Dieline and fit	Supply actual finished dimensions, printable area, seam or overlap, bleed, safe area and application tolerances.
Materials and finish	Specify substrate, adhesive, laminate or varnish, finish and any feasible metallic effect.
Printing and roll	Specify print process, ink or color profile, tolerances, roll core, orientation and winding.
Approved copy	Supply the approved storage statement, exact manufacturer or distributor legal attribution, and any additional required labeling.
Traceability	Confirm who issues and applies lot and expiry or beyond-use values, plus the required format, position and serialization or barcode rules.
Documentation	Provide an exact, verified product-specific document or COA destination before adding a QR or documentation reference.

HANDOFF STATUS

Issued lot and expiry values, purity, assay, sterility, certification, scientific identifiers and documentation links are absent from this design. Supplier proof approval and press release are pending. Website artwork direction is recorded in KAN-59/10615 and KAN-225/10616.
