

Xenios Technologies, Inc. — Comprehensive Site Specification v2 (Major Revision)

Domain: xeniostechnology.com · **HQ:** Austin, TX · **Stage:** Pre-seed · **Stance:** Stealth **Single inbox:** team@xeniostechnology.com · **Socials:** [instagram.com/officialxenios](https://www.instagram.com/officialxenios) · [linkedin.com/company/officialxenios](https://www.linkedin.com/company/officialxenios) **Live waitlist counter baseline:** 550 (real-time)

This document is the designer + developer handoff. Every copy block in a fenced code block is verbatim. The wordmark `xenios.` always carries the period — the period is the mark.

PART 1 — Alternative Hero Headlines

The brief is clear: the previous hero "COACHING WAS NEVER THE BOTTLENECK." was descriptive, not iconic. A great hero headline does three things at once — names the category, plants a flag for the future, and reads like a poster from across the room. Below are 12 options ranked by how well they do all three. All are designed to be set in PP Neue Montreal / Aeonik Pro at weight 800–900, tight tracking, two lines max.

Rank	Headline	Words	Read	Notes
1	The proactive health OS.	4	iconic	Names category in 4 words. Echoes "the operating system for X" lineage (Stripe, Notion, Linear). Pairs naturally with "Connecting every dot in the ecosystem." subhead.
2	Every signal. One practitioner.	4	iconic	Captures the connective-tissue thesis without naming the product. Practitioner-first. Reads like a manifesto fragment.
3	Care, finally upstream.	3	iconic	One of the most compressed possible statements of the proactive thesis. "Finally" carries the inevitability tone.
4	The infrastructure of proactive health.	5	strong	Unambiguous fallback.
5	Built where care begins.	4	strong	Beautiful but slightly oblique without subhead support.
6	One workspace. Every signal.	4	strong	Original brief example. Works better now as a sub-headline.
7	The practitioner's substrate.	3	strong	"Substrate" is a powerful tech-infra word. Niche but memorable.
8	Health, finally connected.	3	strong	Mirrors #3's cadence.
9	The connective tissue of proactive care.	6	strong	Most explicit "dots" framing. Slightly long for a hero.
10	Leverage, returned to the practitioner.	5	good	On-thesis but verbose.
11	The next era of care has a workspace.	8	good	Story-forward, slightly long.
12	Proactive health, now operable.	4	good	"Operable" is interesting but academic.

Recommended Top 3 — with rationale

 **#1 — "The proactive health OS."** The recommendation. Four words. Names the category, names the form factor, plants the flag. "OS" carries the right industrial weight — it implies infrastructure, not an app. It also future-proofs the marketing: every product Xenios ships for the next decade is "the [thing] inside the OS." Pairs with "Connecting every dot in the proactive health ecosystem." for the full thesis in 14 words.

 **#2 — "Every signal. One practitioner."** Where #1 names the platform, #2 names the *promise*. It works exceptionally well as the H2 because every word maps to a tile in the ecosystem visualization directly below it. Easier to art-direct.

 **#3 — "Care, finally upstream."** The wildcard. The most emotionally loaded. "Finally" does enormous work — it signals the industry has been waiting for this. Best as the H1 on the manifesto page and the opening shot of any film or deck.

Implementation: Ship **#1** as H1 on `/`. Use **#2** as the H2 lockup beneath the hero and over the ecosystem visualization. Reserve **#3** as the H1 on `/manifesto`.

PART 2 — The New Homepage (tight, poster-like, 3-4 viewport heights)

Viewport math assumes a 1440×900 desktop reference. Full homepage scroll length, including footer, should be ≤ 3,800px desktop / ≤ 5,200px mobile.

Layout map

VP1 — Top ribbon (28px) + Nav (72px) + Hero (remaining 800px)
VP2 — Thesis line (480px) + Ecosystem section header begins
VP3 — Ecosystem constellation (720px) + Built-for grid begins
VP4 — Built-for grid continues + Trust strip + Final CTA + Footer

2.1 Top Ribbon (sticky, dismissible)

xenios is in stealth. early access opens in waves. join the waitlist → [LIVE: 550]

- "join the waitlist" → `/waitlist`
- `[LIVE: 550]` renders as `LIVE • {count}` in mono; live component.

2.2 Navigation

Left: `xenios.` wordmark (→ `/`) Right (pipe-separated visual rhythm; final item is a button):

product manifesto ecosystem careers about contact → join the
waitlist

- `product` → `/product`
- `manifesto` → `/manifesto`
- `ecosystem` → `/#ecosystem` (smooth scroll)
- `careers` → `/careers`
- `about` → `/about`
- `contact` → `/contact`
- `join the waitlist` → primary button → `/waitlist`

2.3 Hero (Viewport 1)

Visual slot: Full-bleed atmospheric gradient behind H1, slightly grainy, OKLCH-interpolated, preset `gradient-01-dawn`. H1 sits over the gradient in pure ink.

H1 (display, weight 900, tight tracking):
The proactive health OS.

Sub (display, weight 700, 1.1 line-height):
Connecting every dot in the proactive health ecosystem –
wearables, labs, GLP-1, longevity panels, recovery, nutrition,
training, and the practitioner who pulls it all together.

Primary CTA button: join the waitlist →
Secondary CTA (text link, arrow): read the manifesto →

Counter lockup (inline, beneath CTAs, mono):
LIVE • 550 practitioners on the waitlist • updated in real time

- Primary → `/waitlist`
- Secondary → `/manifesto`

2.4 Thesis Line (Viewport 2, top)

Single full-bleed section. Cream background. No card. Just typography.

Visual slot: Atmospheric gradient swatch (`gradient-02-tide`) at ~40% width right of text on desktop; full-width above on mobile.

Eyebrow (mono, weight 600, uppercase, tracking +0.12em):

THE THESIS

H2 (display, weight 800):

Coaching was never the bottleneck. Infrastructure was.

Body (weight 500):

The proactive health practitioner has the protocols, the science, and the relationships. What they don't have is a substrate that makes every signal talk to every other signal – and gives the hours back. Xenios is that substrate.

Inline link: see what xenios connects →

- Inline link → [/#ecosystem](#)

2.5 What Xenios Connects — Ecosystem Visualization (Viewports 2-3)

The most visually ambitious section. Reads as one big poster.

Visual slot: A constellation graph. Center node = [xenios.](#) wordmark. Around it, two concentric rings of 8 satellite nodes each (16 total) — each labeled in mono 500. Thin ink lines connect the center to every satellite; a curated subset of satellite-to-satellite lines (dimmer) implies "the dots that don't currently talk to each other, now do." On scroll-into-view, lines draw in sequentially over ~1.2s. Background: faint [gradient-03-fieldwork](#) at ~60% opacity with film grain.

Section anchor: [#ecosystem](#)

Eyebrow (mono, 600 caps):

THE ECOSYSTEM

H2 (display, 800):

Every signal. One practitioner.

Body (weight 500, max-width 56ch):

The proactive health stack is the most exciting it has ever been – and the most fragmented it has ever been. Wearables don't talk to labs. Labs don't talk to GLP-1 protocols. Protocols don't talk to calendars. Calendars don't talk to outcomes. The practitioner is the integration layer, and the practitioner is exhausted.

Xenios is the connective tissue. Every dot, one substrate, one practitioner in command.

Inline link: meet the ecosystem partners →

- Inline link → </partners>

Constellation node labels (16 satellites):

wearables · continuous glucose · lab panels · longevity markers ·
GLP-1 protocols · sleep & HRV · nutrition logs · training load ·
recovery data · supplement stacks · hormone panels · mental performance ·
calendars · billing · client comms · referring physicians

(Each label: mono, weight 500, 12px. Center node [xenios.](#) in display 900, 28px.)

2.6 Built-for Grid (Viewport 3)

3×6 grid on desktop, 2-col tablet, 1-col mobile. Each tile = a mini atmospheric gradient (rotating presets), thin ink border, single-line label in display weight 700, mono caption beneath. **These are the visuals.** No icons, no illustrations.

Eyebrow (mono, 600 caps):

BUILT FOR EVERY PRACTITIONER MOVING CARE UPSTREAM

H2 (display, 800):

If your practice is proactive, preventive,
or performance-oriented – xenios is for you.

Tiles (label // mono caption):

01 · Personal trainers & strength coaches // performance is data now
02 · Nutritionists & registered dietitians // every meal, every signal
03 · GLP-1 & metabolic health coaches // protocols that personalize
04 · Longevity & performance specialists // panels, paired with practice
05 · Functional medicine practitioners // root cause, fully connected
06 · Health coaches & wellness pros // your protocols, your voice
07 · RNs & RDs in cash-pay practice // clinical-grade, coach-friendly
08 · Recovery, sleep & mind coaches // every modality, one substrate
09 · Biohackers running 1:1 programs // n=1, at scale
10 · Sports & team performance coaches // the locker room, connected
11 · Physical therapists (cash-pay) // movement meets metrics
12 · Chiropractors with wellness programs // beyond the adjustment
13 · Concierge medicine practitioners // care that anticipates
14 · Hormone & HRT specialists // signals, panels, plans
15 · Fertility & reproductive wellness // the long arc of health
16 · Mental performance & executive coaches // cognition is a signal
17 · Recovery & cold-plunge studio operators // throughput, with proof
18 · Independent clinic operators // the practice as platform

Closing line beneath grid (weight 500):

If you run a proactive, preventive, or performance-oriented practice,
xenios was built for you.

Inline link: see the full picture in the manifesto →

- Inline link → </manifesto>

2.7 Trust + Team Credential Strip (Viewport 3, bottom)

One quiet band. No headshots, no names. One paragraph + one figure strip.

eyebrow (mono, 600 caps):

WHO IS BUILDING THIS

Body (display, weight 700, 1.2 line-height):

A founding team with prior healthcare-infrastructure exits totaling \$710M+ — including FinDox and InstaMed — building the operating system the practitioner economy has been waiting for.

Stat strip (mono, weight 600, uppercase):

\$710M+ PRIOR EXITS · AUSTIN HQ · REMOTE TEAM · PRE-SEED
STEALTH

Inline link: more about the team and the mission →

- Inline link → [/about](#)

2.8 Final CTA (Viewport 4)

Full-bleed atmospheric gradient — preset [gradient-06-horizon](#). Paper-on-gradient typography. Counter repeated, larger.

eyebrow (mono, 600 caps):

THE WAITLIST

H2 (display, weight 900, tight):

Every dot connected. Every hour returned. Every practitioner amplified.
The proactive health era starts now.

Counter (display, weight 800):

550 practitioners. and counting.

in stealth. not a medical device. not medical advice.

PART 3 — Updated Manifesto (</manifesto>)

H1 same visual treatment as homepage hero — atmospheric gradient, weight 900.

H1:

Care, finally upstream.

Body, weight 500, max-width 64ch:

For a hundred years, "healthcare" has meant the system you go to after something has already gone wrong. The chart opens when the symptom arrives. The billing code requires a diagnosis. The infrastructure was built for reaction.

We are alive in the first decade where that arrangement is breaking.

A new class of practitioner has emerged – the personal trainer, the nutritionist, the GLP-1 coach, the longevity doctor, the functional medicine practitioner, the recovery operator, the concierge clinician, the executive performance coach – who does not wait for the symptom. They look at the wearable, the panel, the protocol, the program, the sleep, the meal, the mood. They move upstream. They are the most important workforce in the proactive health era.

And they are running the most important work of their lives on spreadsheets, screenshots, group chats, and stitched-together tools that were never built to talk to each other.

We think this is the largest mismatch in modern software.

–

Xenios is the operating system for the proactive health practitioner.

The thesis is simple. Coaching was never the bottleneck. Infrastructure was. Every dot in the proactive health stack – wearables, labs, GLP-1 protocols, food logs, training programs, recovery data, mental health, longevity panels, calendars, billing, referrals, outcomes – runs on a different system. The practitioner is the integration layer. The practitioner is exhausted.

We are building the substrate where every signal becomes one client profile, every protocol becomes infinitely personalizable, every hour of admin becomes an hour of practice, and every AI agent acts with the practitioner's voice, judgment, and protocols – never replacing the human, always extending them.

—

We believe four things.

One. The leverage in healthcare is finally being handed to the practitioner doing the work, not the platform charging the rent. We are building software that hands it to them.

Two. This decade will decide the shape of proactive care for the next fifty years. The infrastructure that gets adopted now – by the coaches, the clinicians, the operators – becomes the infrastructure of human health by 2075. We are building for the long arc.

Three. AI is not the product. AI is the substrate. The product is the practitioner who, with AI as their second pair of hands, can hold more clients, write better protocols, and deliver outcomes a single human could never deliver alone. The agent acts in the practitioner's voice and judgment, or it has no place in this stack.

Four. Connecting the dots is the work. The proactive health ecosystem is the most exciting it has ever been and the most fragmented it has ever been. Xenios is the connective tissue. Every signal, every tool, every human, one substrate.

—

Every dot connected. Every hour returned. Every practitioner amplified.

The proactive health era starts now.
We are building the operating system.
Be on the list when it ships.

PART 4 — Product Page (`/product`)

Dedicated page going deeper than the homepage without unveiling the seven-product roadmap. Five marquee capabilities, each its own atmospheric-gradient section.

Page hero

Eyebrow (mono): THE PRODUCT

H1 (display, 900):

The operating system, in five capabilities.

Sub (weight 500, max-width 60ch):

We are in stealth. We are not going to walk you through the whole roadmap. We will tell you what the practitioner gets in the first release – and why each piece exists.

Inline link: join the waitlist for early access →

Capability 1 — The Living Client Profile

Visual slot: `gradient-01-dawn` card behind a stylized rectangle suggesting a profile silhouette. Faint constellation pattern behind.

01 – THE LIVING CLIENT PROFILE

Every signal, unified.

Today the practitioner has the client's wearable in one app, their lab panel in a PDF, their training log in a spreadsheet, their food log in a screenshot, and their last conversation in a thread.

Xenios collapses that into one living profile. Wearable streams, lab panels, longevity markers, GLP-1 protocols, nutrition, training load, recovery, sleep, hormones, mood – all in one substrate, updated in real time, fully searchable, fully exportable, fully under the practitioner's control.

The profile is the dot the other dots connect to.

Capability 2 — The Protocol Engine

Visual slot: `gradient-02-tide`.

02 – THE PROTOCOL ENGINE

Author once. Personalize infinitely.

Every great practitioner has a playbook – the protocols, programs, and progressions they would run on every client if there were twenty-four hours in a day and no admin.

Xenios is where that playbook lives. Author once, in your own voice, with your own science. Personalize infinitely against the client's living profile. Update the protocol once and it propagates everywhere it lives. The playbook is yours. The leverage is finally yours.

Capability 3 — The Coach Agent

Visual slot: gradient-03-fieldwork.

03 – THE COACH AGENT

Acts with your voice. Defers to your judgment.

The agent layer is not a replacement for the practitioner. It is the practitioner's second pair of hands.

The Coach Agent is trained on the practitioner's protocols, the client's living profile, and the practitioner's voice. It drafts the check-in. It surfaces the anomaly in last night's HRV. It writes the weekly note to the referring physician. It does not ship anything without the practitioner's sign-off.

The human is in command. Always.

Capability 4 — The Ecosystem Connector

Visual slot: gradient-04-meridian. The constellation pattern from the homepage repeats here as the dominant visual.

04 – THE ECOSYSTEM CONNECTOR

The dots, finally talking.

Wearables. Continuous glucose. Lab panels. Longevity markers. GLP-1 protocols. Sleep and HRV. Nutrition logs. Training load. Recovery data. Supplement stacks. Hormone panels. Mental performance scores. Calendars. Billing. Client comms. Referring physicians.

All of it, in one substrate. Read, write, route, reconcile. The practitioner stops being the integration layer.

Inline link: see the ecosystem map →

- Inline link → [/#ecosystem](#)

Capability 5 — The Outcomes Layer

Visual slot: [gradient-05-meadow](#).

05 – THE OUTCOMES LAYER

Proof, in the language clients and referring physicians understand.

Proactive care has always had a proof problem. Subjective wins are real but uncountable. Objective wins are countable but unevenly captured. Xenios closes the gap.

The Outcomes Layer turns every signal into proof – for the client, for the referring physician, for the underwriter, for the next program cohort. The practitioner stops having to explain why what they do works. The data explains.

PART 5 — Contact Page (`/contact`)

Dedicated page with clearly labeled inbound paths, subject-line conventions, and a simple contact form.

Page hero

Eyebrow (mono): CONTACT

H1 (display, 900):

One inbox. Every door.

Sub (weight 500, max-width 60ch):

We are a small team in stealth. To keep response times fast, every inbound runs through `team@xeniosotechnology.com` – sorted by subject line. Pick the path that matches you and use the prefix in brackets.

Inbound paths (six cards, ink border, no gradient — keeps page scannable)

01 — FOR PRACTITIONERS

You run a proactive, preventive, or performance-oriented practice and want early access.

→ Join the waitlist at `/waitlist`

(Already on the list? Watch for your invite email.)

02 — FOR INVESTORS

You run a fund whose thesis lives in proactive health, longevity, applied AI infrastructure, or vertical SaaS.

→ Email `team@xeniosotechnology.com`

Subject prefix: `[INVESTOR]`

More context: `/investors`

03 — FOR PRESS, INFLUENCERS & CONTENT CREATORS

You write, podcast, or build audience in the proactive health space and want to talk to us — on the record or off.

→ Email `team@xeniosotechnology.com`

Subject prefix: `[PRESS]` for journalists

Subject prefix: `[CREATOR]` for influencers, podcasters, creators

04 — FOR INTEGRATION PARTNERS

You build a wearable, a lab, a longevity panel, a CGM, a recovery device, a software tool, or any other signal in the ecosystem and want to plug into Xenios.

→ Email team@xeniosotechnology.com

Subject prefix: [PARTNER]

More context: /partners

05 – FOR CANDIDATES

You want to build the operating system with us. All roles are remote, Austin preferred.

→ See open roles at /careers

Apply directly: team@xeniosotechnology.com

Subject prefix: [ROLE – JOB TITLE]

06 – GENERAL

Anything else.

→ team@xeniosotechnology.com

Subject prefix: [HELLO]

Contact form (below the cards)

A simple, heavy-weight form. No analytics drama, no marketing fields.

Eye brow (mono): OR JUST WRITE US

Form fields:

- Name (required, text)
- Email (required, email)
- I am a... (required, select):
 - a practitioner
 - an investor
 - a journalist or creator
 - a potential integration partner
 - a candidate
 - something else
- Subject (required, short text – auto-prefixes based on selection)
- Message (required, long text, min 20 chars)

Submit button: send →

After submit (success state):

Thanks. We read every message at team@xeniosotechnology.com.
Expect a reply within two business days.

After submit (failure state):

Something broke on our side. Write us directly at
team@xeniosotechnology.com and we'll pick it up there.

Page footer line

While you wait –
follow @officialxenios on Instagram and Xenios on LinkedIn.
The vision shows up there first.

PART 6 — Investors Page (</investors>)

Soft landing. No deck. No financials. A short, confident page.

Eye brow (mono): INVESTORS

H1 (display, 900):

If your thesis lives where the puck is going,
we should talk.

Body (weight 500, max-width 60ch):

Xenios is a pre-seed company in stealth, headquartered in Austin, Texas. We are building the operating system for the proactive health practitioner – the connective tissue between every signal, tool, and human in the proactive health ecosystem.

The founding team has prior healthcare-infrastructure exits totaling \$710M+, including FinDox and InstaMed.

We are not running a process. We are talking, carefully and quietly, to a small number of funds and operators whose conviction in proactive health, longevity, applied AI infrastructure, or vertical SaaS for the practitioner economy is already strong.

If that's you, write us.

Inline path:

- team@xeniosotechnology.com
- Subject prefix: [INVESTOR]
- Please include: fund name, thesis fit in one paragraph, recent relevant investments.

We reply to every serious note.

Why we exist (3-line block, weight 700):

Coaching was never the bottleneck. Infrastructure was.
This decade decides the shape of proactive care for the next fifty years.
We intend to be the substrate it runs on.

Closer:

PART 7 — Partners Page (</partners>)

For influencers, content creators, wearable/lab companies, integration partners.

Eyebrow (mono): PARTNERS

H1 (display, 900):

The ecosystem is the product.

Sub (weight 500, max-width 60ch):

Xenios is the connective tissue between every dot in proactive health. We can't be that alone – and we don't want to be. If you build a signal, a device, a panel, a tool, an audience, or a piece of content that lives in this space, there is a door for you here.

Three partner tracks (each with an atmospheric gradient card)

01 – INTEGRATION PARTNERS

You build a wearable, a CGM, a lab panel, a longevity service, a recovery device, a training platform, a nutrition tool, a billing or scheduling system, or any other practitioner-adjacent product.

We want your signal flowing through Xenios. Practitioners want it too. The substrate is open by design.

→ team@xeniosotechnology.com

→ Subject prefix: [PARTNER – INTEGRATION]

→ Please include: company, what you ship, an API or data-spec link if one exists.

02 – CREATORS, PODCASTERS & WRITERS

You build audience in proactive health, longevity, performance, metabolic health, recovery, or the coach economy. You want early access, an honest conversation with the founders, or a co-built piece of content.

We treat creators as peers. The vision deserves to be seen.

- team@xenios technology.com
- Subject prefix: [CREATOR]
- Please include: your platform, your audience focus, what you'd like to build.

03 – INFLUENCERS & FRONT-OF-CAMERA PRACTITIONERS

You are a public-facing proactive health practitioner with a real practice and a real audience. You want to be one of the first to run your practice on Xenios and one of the first to tell the ecosystem about it.

We have a small, hand-picked early cohort. It is not a discount code program. It is a partnership.

- team@xenios technology.com
- Subject prefix: [CREATOR – PRACTITIONER]

→ Follow Xenios on LinkedIn

The vision shows up there first.

(Counter rolls up by 1 in-view via SSE.)

Beneath the form, three-line trust block:

Built by a team with prior healthcare-infrastructure exits totaling \$710M+ – including FinDox and InstaMed.

Headquartered in Austin, TX. Pre-seed. In stealth.

We don't share your email. Ever. See /security.

8.2 **/about**

Eyebrow (mono): ABOUT

H1 (display, 900):

A small team. A long arc. One operating system.

Body (weight 500):

Xenios Technologies, Inc. is a pre-seed company headquartered in Austin, Texas. We are building the operating system for the proactive health practitioner – the connective tissue between every signal, tool, and human in the proactive health ecosystem.

We are in stealth because the work deserves it. We will introduce the team in full when the product opens. Until then, here is what matters.

—

THE TEAM

A founding team with prior healthcare-infrastructure exits totaling \$710M+, including FinDox and InstaMed. Operators who have shipped into clinical workflows, payment rails, and the parts of the system where mistakes are not abstract. We have been here before. We know where the bodies are buried.

—

THE BELIEFS

- Coaching was never the bottleneck. Infrastructure was.
- This decade decides the shape of proactive care for the next fifty years.
- Leverage belongs to the practitioner doing the work, not the platform charging the rent.
- AI agents act with the practitioner's voice and judgment, or they have no place in this stack.
- Connecting the dots is the work.

—

THE COMPANY

Headquartered in Austin, TX. Remote team. Hiring across engineering, product, design, and partnerships. All roles remote, Austin preferred.

Inline link: see open roles →

Inline link: read the manifesto →

Inline link: talk to the team →

- Links → </careers>, </manifesto>, </contact>

8.3 </careers>

Hero:

EyeBrow (mono): CAREERS

H1 (display, 900):

Build the operating system
for the next fifty years of human health.

Sub (weight 500, max-width 60ch):

Five founding roles. All remote, Austin preferred. Every one of
them ships into the first release. Every one of them earns equity
in the substrate.

How we work (weight 500):

- Remote-first. Austin preferred for in-person sprint weeks.
- Founding equity for every founding hire.
- Small team. High trust. Few meetings. Long arcs.
- We hire for taste, judgment, and shipping muscle.
- We expect every founding hire to act like a founder, because they are one.

Open roles (five cards — no advisor):

01 – FOUNDING SENIOR SOFTWARE ENGINEER

Architect of the substrate. Owns the core platform: client profile, protocol engine, integrations, agent runtime. Comfortable in TypeScript, Postgres, distributed systems, and writing the boring code that has to be right.

Remote, Austin preferred.

Apply: team@xeniosotechnology.com

Subject prefix: [ROLE – SENIOR SOFTWARE ENGINEER]

02 – FOUNDING PRODUCT ENGINEER

Ships the surfaces practitioners actually touch. Builds, dogfoods, iterates. Lives where product, design, and engineering meet. Comfortable owning a feature end-to-end and shipping in days, not quarters.

Remote, Austin preferred.

Apply: team@xeniosotechnology.com

Subject prefix: [ROLE – PRODUCT ENGINEER]

03 – FOUNDING AI / ML ENGINEER

Owns the agent layer. Trains, evaluates, and ships the Coach Agent and the model infrastructure behind it. Comfortable with eval rigor, retrieval pipelines, and the line between "demo" and "production" for AI in regulated-adjacent workflows.

Remote, Austin preferred.

Apply: team@xeniosotechnology.com

Subject prefix: [ROLE – AI/ML ENGINEER]

04 – FOUNDING UI / UX DESIGNER

Shapes the substrate. Owns the visual system, the interaction language, and the practitioner's daily surface. Editorially literate. Comfortable in Figma and in prose. Reads design as argument.

Remote, Austin preferred.

Apply: team@xeniosotechnology.com

Subject prefix: [ROLE – UI/UX DESIGNER]

05 – FOUNDING COACH PARTNERSHIPS LEAD

Owns the early cohort. Recruits, onboards, and grows with the first 100 practitioners on the platform. Already lives in the proactive health world – by background, by relationships, by instinct.

Remote, Austin preferred.

Apply: team@xeniosotechnology.com

Subject prefix: [ROLE – COACH PARTNERSHIPS]

Closer:

Don't see your role but think you should be here?

Write us anyway.

team@xeniosotechnology.com

Subject prefix: [ROLE – OPEN]

8.4 [/faq](#)

Eyebrow (mono): FAQ

H1 (display, 900):

Honest answers.

—

WHAT IS XENIOS?

The operating system for the proactive health practitioner. The connective tissue between every signal, tool, and human in the proactive health ecosystem.

WHO IS IT FOR?

Anyone running a proactive, preventive, or performance-oriented practice. Personal trainers and strength coaches. Nutritionists and registered dietitians. GLP-1 and metabolic health coaches. Longevity and performance specialists. Functional medicine practitioners. Health coaches and wellness pros. RNs and RDs in cash-pay practice. Recovery, sleep, and mind coaches. Biohackers running paid 1:1 programs. Sports and team performance coaches. Physical therapists in cash-pay practice. Chiropractors with wellness programs. Concierge medicine practitioners. Hormone and HRT specialists. Fertility and reproductive wellness coaches. Mental performance and executive coaches. Recovery and cold-plunge studio operators. Independent clinic operators. Anyone moving care upstream.

WHEN DOES IT OPEN?

We're opening in waves. Position on the waitlist decides the order.

DO I HAVE TO BE IN THE U.S.?

No. The waitlist is global. Early waves prioritize practitioners in North America for pilot reasons; international waves follow quickly.

IS THIS A MEDICAL DEVICE?

No. Xenios is software infrastructure for practitioners. It is not a medical device. It is not medical advice. It does not diagnose, treat, cure, or prevent any disease. Practitioners using Xenios remain responsible for the clinical decisions they make.

DO YOU REPLACE THE COACH WITH AI?

No. We extend the coach with AI. The Coach Agent acts with the practitioner's voice, judgment, and protocols – and never ships anything without sign-off. The human is in command.

WHO IS BUILDING THIS?

A founding team with prior healthcare-infrastructure exits totaling \$710M+, including FinDox and InstaMed. We will introduce the full team when the product opens.

HOW DO YOU HANDLE MY DATA AND MY CLIENTS' DATA?

See /security. Short version: encryption in transit and at rest, least-privilege access internally, no sale of data ever, and a posture built for HIPAA-grade workflows where the practitioner operates in them.

HOW DO I JOIN THE WAITLIST?

Right here: /waitlist.

HOW DO I REACH THE TEAM?

team@xeniosotechnology.com. Subject-line conventions live at /contact.

IS THIS COMPANY HIRING?

Yes. Five founding roles, all remote, Austin preferred. /careers.

ARE YOU RAISING?

We're talking, quietly. /investors.

Closer inline link: still have questions? talk to the team →

- Inline link → </contact>

8.5 </security>

Eyebrow (mono): SECURITY & DATA

H1 (display, 900):

Built for the most sensitive surface in human life.

Body (weight 500):

The proactive health practitioner sees more about their client than any other professional in that client's life. The substrate that holds that surface has to be worthy of it.

We are building Xenios with that worthiness as a non-negotiable.

—

OUR POSTURE

- Encryption in transit (TLS 1.2+) and at rest (AES-256).
- Least-privilege access controls internally. Audit logs on every privileged action.
- Cloud infrastructure on hardened, SOC 2 Type II-aligned providers.
- Designed to operate in HIPAA-grade workflows where the practitioner operates in them. Practitioners running covered workflows can request a BAA in the early-access program.
- Backups and recovery designed for continuity, not theater.

OUR PROMISES

- We do not sell your data. Ever. Not anonymized. Not aggregated. Not as a "research partnership." Never.
- Practitioner-owned data stays practitioner-owned. Export is a first-class feature, not a retention trap.
- Clients have a path to access, correct, and delete their own data.

OUR LIMITS

We are pre-seed. We are honest about where the formal certifications sit today and where they are going. We will publish a real trust-and-compliance page when the product opens. If you are an enterprise practitioner or operator with specific compliance needs, write us at team@xeniosotechnology.com with subject prefix [SECURITY].

Closing line:

Trust is a substrate too. We are building it the same way we are building the rest of this.

PART 9 — Updated Visual Design System

9.1 Brand summary

Element	Spec
Wordmark	 — all lowercase, period included, never separated from the letters. The period is the "dot" in "connect the dots."

Element	Spec
Visual lineage	Healf HX26 — heavy geometric sans-serif, atmospheric gradient compositions, cream-paper + pure-ink palette, B&W editorial moments, full-stop signature.
Tone	Inevitable. Confident. Industrial. Quiet.

9.2 Color palette (unchanged)

Token	Hex	Usage
--paper	 #F4EFE6	Page background (cream)
--paper-2	 #EAE3D6	Surface tint, alt sections
--ink	 #0E0E0C	Body text, primary type
--ink-2	 #2A2A26	Secondary text
--ink-mute	 #6A6A62	Tertiary, mono captions
--rule	#0E0E0C @ 12%	Hairlines, dividers
--accent-pulse	 #FF5A1F	Live counter pulse, signal moments only
--accent-meadow	 #264E36	Section accent (rotates)
--accent-meridian	 #1F3A5F	Section accent (rotates)
--accent-dawn	 #C66A4A	Section accent (rotates)
--accent-tide	 #3E6E78	Section accent (rotates)

9.3 Typography — HEAVIER WEIGHTS (no thin fonts anywhere)

Primary: PP Neue Montreal (preferred) or Aeonik Pro (fallback). **Mono:** JetBrains Mono or IBM Plex Mono. **Weight rule:** Body = **500 minimum**. Display = **700 / 800 / 900 only**. Mono = **500 / 600 only**. No 400. No 300. No 200. Anywhere.

Style	Family	Weight	Size (desktop)	Size (mobile)	Line	Tracking	Case
Display XL (hero H1)	PP Neue Montreal	900	96-120px	56-64px	1.02	-0.02em	sentence
Display L (page H1)	PP Neue Montreal	900	72-88px	44-52px	1.04	-0.02em	sentence
Display M (H2)	PP Neue Montreal	800	48-56px	32-36px	1.08	-0.015em	sentence
Display S (H3)	PP Neue Montreal	700	32-36px	24-28px	1.12	-0.01em	sentence
Body L	PP Neue Montreal	500	20px	18px	1.5	0	sentence
Body M	PP Neue Montreal	500	17px	16px	1.55	0	sentence
Body S	PP Neue Montreal	500	14px	13px	1.55	0	sentence
Quote / lead	PP Neue Montreal	700	28-32px	22px	1.3	-0.01em	sentence
Mono caption	JetBrains Mono	600	12-13px	12px	1.5	+0.06em	UPPER
Mono label	JetBrains Mono	500	13-14px	12px	1.5	+0.04em	lower
Button label	PP Neue Montreal	700	16px	15px	1.0	0	sentence

9.4 The six atmospheric gradient presets

Use OKLCH interpolation. Add subtle film grain ($\approx 4\%$ opacity, 1.2px noise). No high-contrast stops. [Colorarchive](#) [Colorarchive](#)

Preset	Stops (OKLCH direction)	Mood	Used on
<code>gradient-01-dawn</code>	warm cream → coral → muted clay	Awakening, hero	Homepage hero, /product cap 01
<code>gradient-02-tide</code>	pale teal → slate → ink-shadow	Calm, infrastructural	Thesis section, /product cap 02
<code>gradient-03-fieldwork</code>	sand → ochre → moss	Practical, grounded	Ecosystem section, /product cap 03
<code>gradient-04-meridian</code>	ivory → cobalt → deep navy	Long-arc, inevitable	/product cap 04, /investors hero
<code>gradient-05-meadow</code>	bone → sage → forest	Living, biological	/product cap 05, /about
<code>gradient-06-horizon</code>	cream → dusk-pink → ink	Closing, declarative	Final CTA on homepage, /manifesto closer

9.5 Atmospheric gradient imagery slots — site-wide map

These are the visuals. No product mockups. No stock photography. No team photos.

Page	Slot	Preset	Notes
/ Hero	Full-bleed behind H1	01-dawn	Largest gradient surface on the site
/ Thesis	Right-side 40% card	02-tide	Quiet, paired with type
/ Ecosystem	Background of constellation	03-fieldwork	Faint, lets graph dominate
/ Built-for grid	6 tiles, rotated	All 6	Each tile = a small gradient card
/ Final CTA	Full-bleed	06-horizon	Paper-on-gradient typography
/manifesto Hero	Full-bleed	06-horizon	Same closing energy as homepage CTA
/product Each capability	Section card	01 → 05 in order	One preset per capability
/about Hero band	30% strip	05-meadow	Quiet
/careers Hero band	30% strip	04-meridian	Long-arc
/investors Hero	Full-bleed	04-meridian	Long-arc, inevitable
/partners Each track	Card per track	01, 03, 05	One preset per track
/contact	No gradient	—	Form-forward, scannable
/faq , /security	Hero band only	02-tide	Quiet

9.6 Ecosystem visualization concept (the "connect the dots" graphic)

Form: A constellation graph. Center: [xenios.](#) wordmark in display 900. Around the center: two concentric rings of 8 nodes each (16 total), each labeled in mono 500.

Lines:

1. **Primary lines** (full ink, weight 1.5px) — every satellite to the center.
2. **Secondary lines** (ink @ 30%, weight 1px) — a hand-curated subset of satellite-to-satellite connections, suggesting which dots Xenios makes talk to each other.

Motion:

- On scroll-into-view, lines draw in sequentially over ~1.2s (primary first, then secondary).
- Nodes fade in as their primary line completes.
- On desktop hover, each satellite emits a soft pulse in `--accent-pulse` for 600ms.

Behind the graph: Faint `gradient-03-fieldwork` at ~60% opacity with film grain.

Accessibility: A text alternative listing all 16 nodes and their connections. Motion respects `prefers-reduced-motion: reduce` — falls back to a static rendering with all lines and nodes visible.

9.7 Component spec (heavier feel)

Component	Spec
Buttons primary	Solid ink fill, paper text. 14px vertical padding, 22px horizontal. Border-radius 4px. Weight 700. No gradient on button.
Buttons secondary	Text link with arrow. Weight 600. Underline on hover only.
Cards	1px <code>--rule</code> border. Border-radius 6px. No drop shadow. Padding 28px.
Live counter	Mono 600, all caps, leading bullet  , with subtle <code>--accent-pulse</code> dot that pulses every 4s.
Form fields	1.5px ink border. Border-radius 4px. Padding 14px. Label above field, weight 600.
Nav	Sticky, paper background, 1px bottom rule on scroll. Items weight 600.
Top ribbon	Ink background, paper text. Height 32px. Dismissable with  on the right.

9.8 Motion

- Page transitions: 280ms ease-out fade + 8px translate-up.
- Section reveals: 600ms ease-out, single direction (up), 80ms stagger for sibling elements.
- Counter increment: 400ms tween on number change, with subtle pulse on the .
- Constellation: see 9.6.
- All animations respect `prefers-reduced-motion`.

Sent via Resend. Plain-text and HTML versions. Heavier typography in HTML version mirrors the site.

10.1 Internal alert — to team@xeniosotechnology.com on every signup

Subject:

```
[WAITLIST] +1 - {first_name} {last_name} - #{position} - {practitioner_type}
```

Body (plain-text):

```
new waitlist signup.

name:          {first_name} {last_name}
email:         {email}
practitioner:  {practitioner_type}
location:      {city}, {country}
position:      #{position}

```

10.2 Waitlist confirmation — to the signup user

From: team@xeniosotechnology.com **Reply-to:** team@xeniosotechnology.com **Subject:**

```
You're on the xenios waitlist. (#{position})
```

Body (HTML, mirrors site type system — heavier weights, cream background, ink type):

Eye brow (mono 600 caps):

WELCOME

H1 (display 800):

You're in.

Body (500):

Thank you for joining the xenios waitlist.

You are #{position} on the list. There are now {total_count} practitioners with us.

We are opening early access in waves. Position on the waitlist decides the order. When your wave opens, you'll hear from this same address – team@xeniosotechnology.com.

—

WHILE YOU WAIT

The vision shows up first on our channels. Two quick follows:

- Instagram: @officialxenios (<https://www.instagram.com/officialxenios/>)
- LinkedIn: Xenios (<https://www.linkedin.com/company/officialxenios>)

—

A LITTLE OF WHAT'S COMING

Xenios is the operating system for the proactive health practitioner – the connective tissue between every signal in the proactive health ecosystem. Wearables, labs, GLP-1, longevity panels, recovery, nutrition, training, mental performance – every dot, one substrate, one practitioner in command.

Every dot connected. Every hour returned. Every practitioner amplified.

Coaching was never the bottleneck. Infrastructure was.
We are building the infrastructure.

—

If you have a friend in the practice who should be on this list,
forward them: <https://xeniosotechnology.com/waitlist>

If you want to talk to us directly, write to
team@xeniosotechnology.com.

—
xenios.
infrastructure for the next fifty years of human health.

Austin, TX · in stealth.

Plain-text fallback: Same copy, single-column, dashes for separators, links inline as URLs.

10.3 Application receipt (for [ROLE - ...] emails)

Auto-reply when a [ROLE - ...] subject hits the inbox.

Subject:

Re: {original_subject} — we have it.

Body:

We have your application. Thank you.

Every founding role is read personally by the founders. You will
hear back from us — yes or no — inside ten business days.

While you wait:

- /manifesto — why we exist.
- /product — what we're building.
- @officialxenios on Instagram and LinkedIn — the vision in motion.

xenios.

10.4 Contact-form auto-reply

Auto-reply when the contact form on [/contact] is submitted.

Subject:

We have it. – xenios

Body:

Thanks for writing.

Every message that hits team@xeniosotechnology.com is read by a human. We reply to every serious note inside two business days.

In the meantime, two quick follows:

- Instagram: @officialxenios
- LinkedIn: Xenios

–

xenios.

PART 11 — Technical Implementation

11.1 Stack (unchanged)

Layer	Choice	Notes
Framework	Next.js 14 (App Router)	React Server Components, route handlers
Hosting	Vercel	Edge runtime where possible
Database	Postgres on Neon	Serverless, branching for staging
ORM	Drizzle	Typed schema, migrations in repo
Email	Resend	Transactional, React Email templates
Realtime counter	Postgres LISTEN/NOTIFY → server-sent events (SSE)	Polling fallback at 8s
Forms	Server Actions + Zod validation	No third-party form service

Layer	Choice	Notes
Analytics	Vercel Analytics + Plausible	Privacy-respecting only
DNS / mail	Vercel-managed; <code>team@</code> MX via Resend or Google Workspace	DKIM/SPF/DMARC verified
Type system	TypeScript strict mode	No <code>any</code> , no implicit

11.2 Data model (Drizzle / Postgres)

sql

```

create table waitlist_signups (
  id uuid primary key default gen_random_uuid(),
  first_name text not null,
  last_name text not null,
  email citext not null unique,
  practitioner_type text not null,
  city text not null,
  country text not null,
  free_text text,
  how_heard text,
  position integer not null,
  created_at timestamptz not null default now(),
  ip_country text,
  user_agent text
);

create table counter_state (
  id smallint primary key default 1,
  base_count integer not null default 550,
  signups_count integer not null default 0,
  updated_at timestamptz not null default now(),
  check (id = 1)
);

create view v_public_counter as
  select (base_count + signups_count) as total, updated_at
  from counter_state;

create or replace function bump_counter() returns trigger as $$
begin
  update counter_state
    set signups_count = signups_count + 1,
        updated_at = now()
  where id = 1;
  perform pg_notify('counter_changed', (select total::text from v_public_counter));
  return new;
end;
$$ language plpgsql;

create trigger trg_bump_counter
after insert on waitlist_signups
for each row execute function bump_counter();

```

Position assignment: in the server action, `select count(*)+1 from waitlist_signups` is computed inside the same transaction as the insert (with `select ... for update` on `counter_state`) to guarantee monotonic positions under concurrent submits.

11.3 Live counter — SSE endpoint

```
ts

// app/api/counter/stream/route.ts
export const runtime = 'nodejs';

export async function GET() {
  const stream = new ReadableStream({
    async start(controller) {
      const enc = new TextEncoder();
      const send = (n: number) =>
        controller.enqueue(enc.encode(`data: ${n}\n\n`));

      const { total } = await db.selectFromPublicCounter();
      send(total);

      const client = await pool.connect();
      await client.query('LISTEN counter_changed');
      client.on('notification', (msg) => {
        if (msg.channel === 'counter_changed' && msg.payload) {
          send(parseInt(msg.payload, 10));
        }
      });

      const hb = setInterval(() => controller.enqueue(enc.encode(`:hb\n\n`)), 20_000);
      return () => { clearInterval(hb); client.release(); };
    }
  });
  return new Response(stream, {
    headers: {
      'Content-Type': 'text/event-stream',
      'Cache-Control': 'no-cache, no-transform',
      'Connection': 'keep-alive'
    }
  });
}
```

Client component: subscribes to `/api/counter/stream`, tweens the displayed number to the new value over 400ms, pulses the `●` on change. Polling fallback (`/api/counter`) every 8s for environments that strip SSE.

11.4 Waitlist API flow

`POST /api/waitlist` (Server Action preferred; route handler available for embeds)

1. Validate with Zod (email format, required fields, ≤500 chars on free text).
2. Rate-limit per IP via Vercel KV or Upstash Redis — 5 attempts / 10 minutes.
3. Honeypot field check + bot signal.
4. Begin transaction:
 - `INSERT INTO waitlist_signups (...) returning position`.
 - Trigger updates `counter_state` and fires `pg_notify`.
5. Outside the transaction: send Resend confirmation to user + Resend alert to `team@xeniosotechnology.com`. Wrap in `try/catch`; never block the user response on email delivery.
6. Return `{ ok: true, position, total }` for immediate UI update.

11.5 Email routing convention (single inbox, subject-line prefixes)

Prefix	Source	Inbox label
<code>[WAITLIST]</code>	Waitlist signups (auto)	signups
<code>[INVESTOR]</code>	<code>/investors</code> , <code>/contact</code>	investor
<code>[PRESS]</code>	<code>/contact</code>	press-creators
<code>[CREATOR]</code>	<code>/contact</code> , <code>/partners</code>	press-creators
<code>[CREATOR – PRACTITIONER]</code>	<code>/partners</code>	press-creators
<code>[PARTNER]</code>	<code>/contact</code>	partners
<code>[PARTNER – INTEGRATION]</code>	<code>/partners</code>	partners
<code>[ROLE – ...]</code>	<code>/careers</code>	candidates
<code>[SECURITY]</code>	<code>/security</code> , <code>/contact</code>	security (priority)
<code>[HELLO]</code>	<code>/contact</code>	general

Gmail / Workspace filters auto-label and auto-respond where appropriate (10.3, 10.4).

11.6 SEO / OG

Page	Title	Description
/	xenios. — the proactive health OS.	Connecting every dot in the proactive health ecosystem. Built for the practitioner. Join the waitlist.
/manifesto	Care, finally upstream.	Why we are building the operating system for the proactive health practitioner.
/product	The product — xenios.	The five marquee capabilities of the proactive health OS.
/contact	Contact — xenios.	One inbox. Every door.
/investors	Investors — xenios.	If your thesis lives in proactive health, longevity, applied AI infrastructure, or vertical SaaS — write us.
/partners	Partners — xenios.	The ecosystem is the product. Integration partners, creators, influencers.
/careers	Careers — xenios.	Five founding roles. All remote, Austin preferred.
/waitlist	Join the waitlist — xenios.	Be on the list when the proactive health OS ships.
/about	About — xenios.	A small team. A long arc. One operating system.
/faq	FAQ — xenios.	Honest answers.
/security	Security & data — xenios.	Built for the most sensitive surface in human life.

OG image: Programmatic via [@vercel/og](#). Cream background, [xenios.](#) wordmark top-left, atmospheric gradient swatch right, page-specific H1 in display 800.

11.7 Compliance basics

- Footer link to [/privacy](#) and [/terms](#) (boilerplate, to be expanded by counsel).
- Cookie banner only if EU/UK traffic detected via Vercel geo. First-party, privacy-respecting analytics only — banner minimal.
- Footer disclaimer: [not a medical device. not medical advice.](#)

PART 12 — 2-Week Launch Sprint

Two-week sprint to ship v1 with the new tighter homepage and all new pages.

Week 1 — Foundation, homepage, manifesto, waitlist

Day	Owner	Ship
Mon	Design	Lock typography stack (PP Neue Montreal weights 500 / 700 / 800 / 900 + JetBrains Mono 500 / 600). Finalize 6 atmospheric gradient presets in Figma (OKLCH + grain). Wordmark lockup variants.
Mon	Eng	Repo scaffold: Next.js 14, Drizzle, Neon, Resend, Vercel project. CI. Tailwind + design tokens from 9.2 / 9.3.
Tue	Design	Homepage full comps at 1440 and 390. Constellation graph in Figma with all 16 satellite labels. Built-for grid 18 tiles.
Tue	Eng	Postgres schema, migrations, trigger, view, <code>pg_notify</code> wired. Local SSE counter verified end-to-end.
Wed	Design	<code>/manifesto</code> , <code>/waitlist</code> , <code>/contact</code> , <code>/investors</code> comps.
Wed	Eng	Homepage build: ribbon, nav, hero w/ live counter, thesis section, ecosystem constellation (static first pass).
Thu	Eng	Built-for grid (18 tiles, rotated gradients). Trust strip. Final CTA. Footer. Mobile parity.
Thu	Eng	<code>/waitlist</code> page + server action + Zod + Resend confirmation + internal alert + Gmail filters tested.
Fri	Design	<code>/product</code> , <code>/partners</code> , <code>/about</code> , <code>/careers</code> , <code>/faq</code> , <code>/security</code> comps.
Fri	Eng	Constellation motion (line-draw + node fade-in + reduce-motion fallback). Counter tween + pulse. SSE → polling fallback.

Week 2 — Remaining pages, polish, ship

Day	Owner	Ship
Mon	Eng	<code>/manifesto</code> and <code>/product</code> builds. Five capability sections with rotating gradients.

Day	Owner	Ship
Tue	Eng	<code>/contact</code> with subject-line cards + contact form (Server Action, Resend, success/failure states).
Tue	Eng	<code>/investors</code> + <code>/partners</code> builds.
Wed	Eng	<code>/about</code> , <code>/careers</code> (5 role cards, no advisor), <code>/faq</code> (broad audience block), <code>/security</code> .
Wed	Design	Final visual QA pass across all pages. Gradient consistency. Type-weight audit (zero 400 weights anywhere).
Thu	Eng	OG images (programmatic), favicons, metadata, sitemap.xml, robots.txt, 404 page (atmospheric, two CTAs back to <code>/</code> and <code>/waitlist</code>).
Thu	Both	Cross-browser QA: Chrome, Safari, Firefox, mobile Safari, mobile Chrome. Reduced-motion QA. Keyboard navigation QA. Form submission load test (~100 concurrent).
Fri AM	Eng	Production cutover. DNS, <code>team@</code> MX, Resend domain verification (DKIM/SPF/DMARC). Vercel Analytics + Plausible live. Counter live at 550.
Fri PM	Both	Soft launch: post to @officialxenios on Instagram and Xenios on LinkedIn. Internal alert tested with a live signup. Monitor counter, monitor inbox routing, monitor error budget.

Definition of done (v1)

- ☐ Homepage scrolls in $\leq 3,800\text{px}$ desktop / $\leq 5,200\text{px}$ mobile.
- ☐ Live counter starts at 550, increments on every real signup, animates with tween + pulse, SSE-driven, polling fallback verified.
- ☐ Zero team names anywhere on the site.
- ☐ Zero font weights below 500 anywhere on the site.
- ☐ All emails route to `team@xeniosotechnology.com` and arrive at correct labels via subject-line filters.
- ☐ Waitlist confirmation email mentions: vision hint, Instagram follow, LinkedIn follow, waitlist position.
- ☐ All five founding roles listed, all marked "Remote, Austin preferred." No advisor role anywhere.
- ☐ Audience list of 18+ practitioner types appears on `/` built-for grid, `/faq`, and `/waitlist` select.
- ☐ "Connecting every dot in the proactive health ecosystem" appears in the hero subhead.

- ☐ "Every dot connected. Every hour returned. Every practitioner amplified." appears in the final CTA and the waitlist confirmation email.
- ☐ No product mockups on any page. All visuals are atmospheric gradient compositions + the constellation graph.
- ☐ (/contact), (/investors), (/partners) shipped with subject-line conventions.
- ☐ Wordmark (xenios.) appears with the period in every header and footer.
- ☐ Footer disclaimer: (not a medical device. not medical advice.)

—

End of specification v2. This document is publication-ready and engineering-ready. The recommended hero is "**The proactive health OS.**"; the H2 lockup is "**Every signal. One practitioner.**"; the manifesto hero is "**Care, finally upstream.**" The substrate is specified. Now ship it.
